Topics in RISC-V Maintenance (LPC 2025)

We (the RISC-V Linux community) need to do better

- Need more testing, especially by vendors on hardware emulation
- Need detailed test reports posted to the list so we know what was tested
- Need more high-quality reviews
  - Andrew Jones and Radim Krcmar are showing the way
- Need new contributors to learn how to interact with the Linux community. We are upsetting people
- Planned feature removal
  - Kendryte K210
  - M-mode Linux?
- Moving non-conforming ISA extensions under CONFIG_RISCV_NONCONFORMING
  - Please tell your hardware architects to conform to the specifications!

Exciting times ahead

- RVA23 hardware should reach the market in 2026
- RISC-V Server Platform specification nearing ratification
- You probably have several RISC-V cores on you right now (not running Linux – yet)
- Please come talk with us after the MC
