* Backport PR bootstrap/44768, miscompilation of dpkg on ARM with -O2
* Fix earlyclobbers on some arm.md DImode shifts (may miscompile "x >> 1"), taken from the trunk.
* Revert PR tree-optimization/36262 on i386, causing miscompilation of OpenJDK hotspot.
* decrease optimisation level for debian-arm to work around gcc bug
* libxslt/transform.c: Patch from upstream CVS to fix hangs and segfaults when processing XCB protocol definitions. Closes: #398327, again.
* debian/control: weee! dependency ping-pong! libpng2... no, libpng3... no, libpng2...
* Rebuild in a build environment without nvidia packages installed.

Quick Search

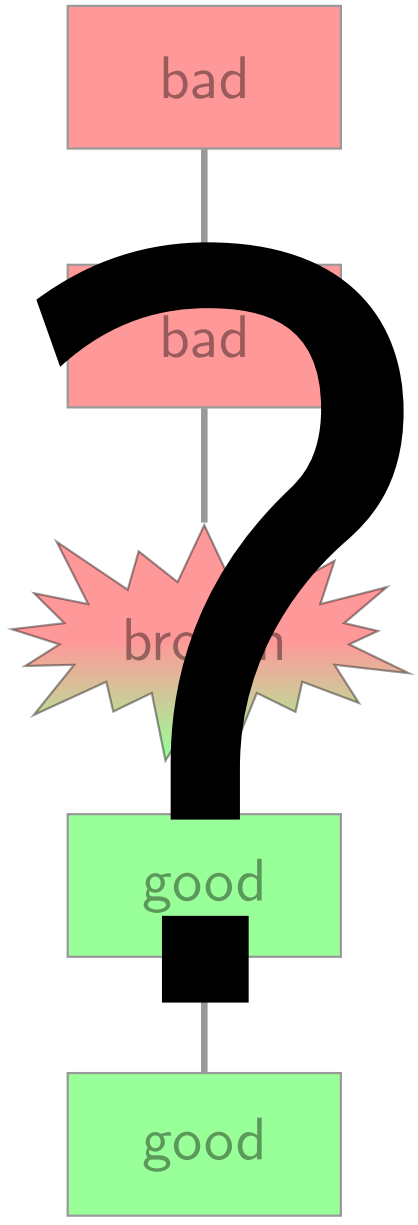

This list is too long for GCC Bugzilla's little mind; the Next/Prev /First/Last buttons won't appear on individual bugs.

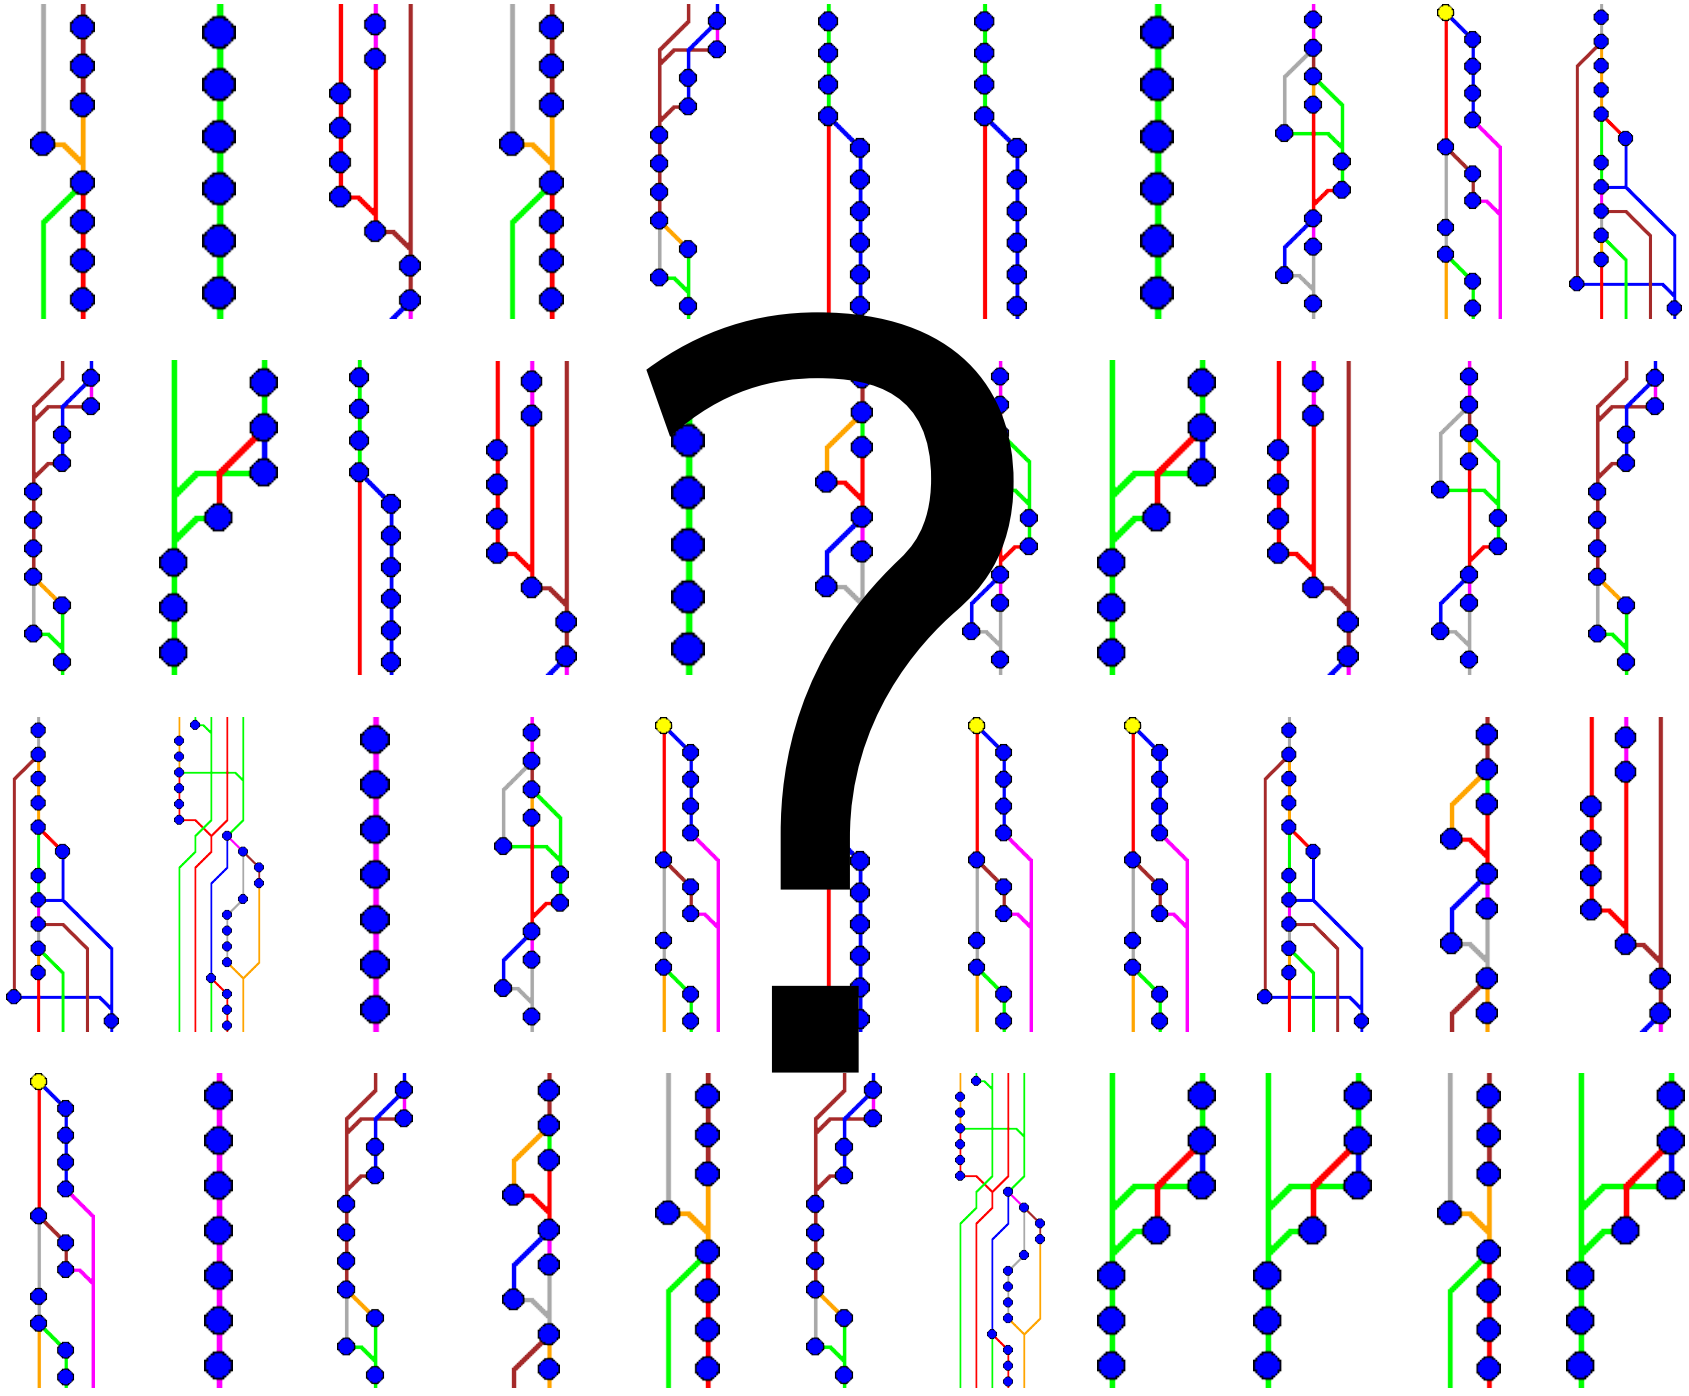

Keywords: wrong-code

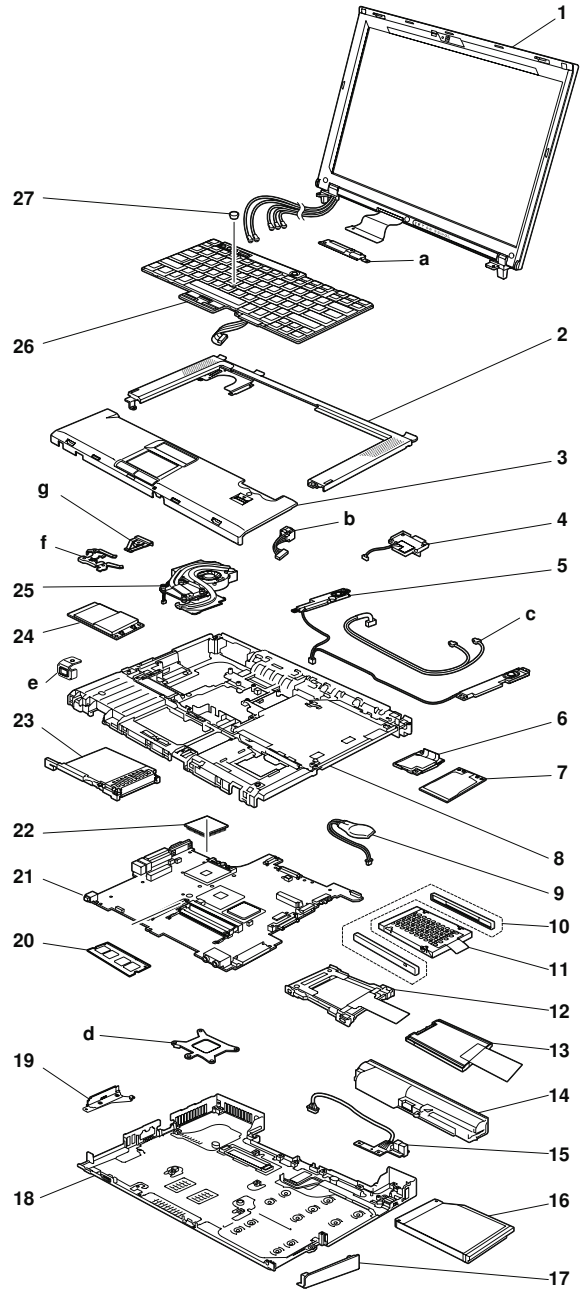

4487 bugs found.
