DSA and L1 status update

Andrew Lunn <andrew@lunn.ch>

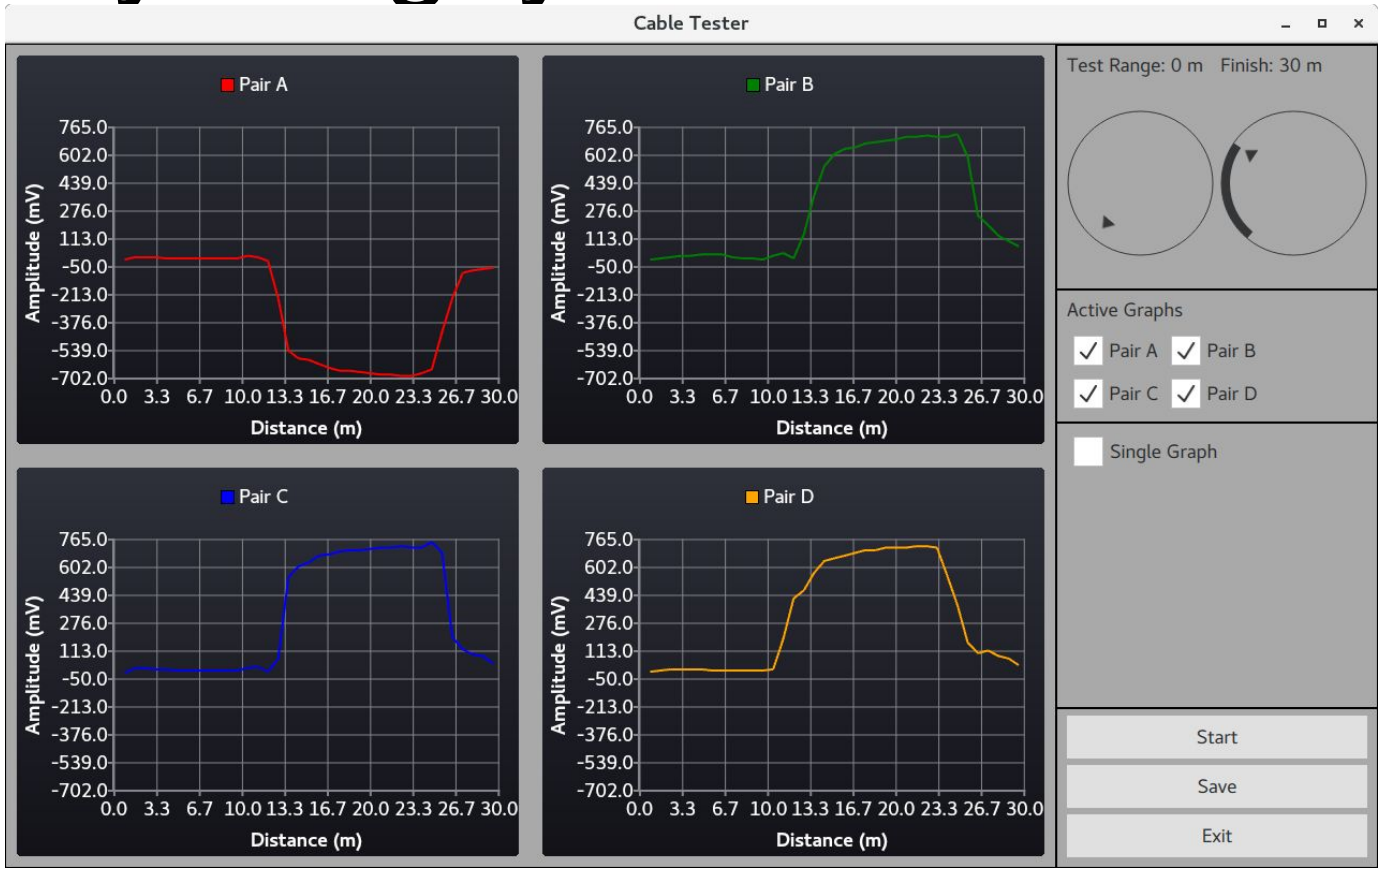

DSA

- Around 105 Layer 2 switches.
- This year:
  - ksz9893, ksz9567, ksz9477, ksz8563, ksz8795, ar9331, felix.
- Core is stable, some incremental changes, bug fixes, but no new big features. Does what the current users want.

Layer 1, PHYs, SFPs etc

- C45 support for multigige PHYs maturing
- Netlink ethtool finally landed
- Cable testing: Marvell, Broadcom, Atheros PHYs
- Cable testing raw TDR: Marvell
- ACPI support DOA
- Growing interest in PTP and MACSeC

Cable test TDR GUI
by Sergey Zhuravlevich

Coming Soon

- Layer 1.5: PCS
  - Connecting the MAC to the PHY is getting more complex. Needs drivers, which could be shared
- LED configuration
  - Marek Behún taking the lead to implement a uniform way to configure the blinking of PHY LEDs
- ACPI?
